690 ENDURO R FEATURES

ENGINE

Welcome to the next generation of the legendary KTM LC4 single cylinder powerhouse! Still as bulletproof and hard-hitting as ever, but updated with new Clutch and Stator covers, crankcase, an improved oil delivery system, and - most importantly - more performance

TFT DISPLAY & CONNECTIVITY

The 4.2" TFT dashboard takes prime position ahead of the rider, featuring a unique, specially-designed user interface to suit the compact screen size. Made from bonded glass, the TFT screen also boasts a special coating and polarization to reduce glare and increase visibility in all lighting conditions. Riders can also access music, incoming calls, turn-by-turn navigation, and Ride modes via the dashboard - with a USB-C port for device charging duties.

LED LIGHTING

The KTM 690 ENDURO R is equipped with a powerful LED headlight. Not only do these work when the world becomes dark, but they also provide improved visibility when navigating busy traffic or misty road conditions.

FRONT FORK

Riding over rough terrain is made easier with the WP XPLOR 48 upside-down fork. The KTM 690 ENDURO R's split fork design was originally developed by WP and KTM for the EXC models. It is fitted with springs on both sides with separate damping functions - compression on the left and rebound on the right-hand side. They have no negative influence on each other. Therefore, damping can easily be adjusted via the dials on top of both fork tubes, with 30 clicks of adjustment each.

REAR SHOCK

The WP XPLOR shock absorber is connected to the swingarm by a linkage. This ensures a progressive suspension character and a high resistance to bottoming out. Fully adjustable, including high and low-speed compression, you can set up the shock absorber to any circumstances and rider preference.

BRAKES

Sublime class-leading BREMBO brakes combined with lightweight wave discs - 300 mm diameter front and 240 mm on the rear wheel - to provide a crucial combination of stopping power and a consistent brake feel.
